

Please do NOT overturn or modify the NJ "Do Not Call" Program whatsoever!!!! It has eliminated virtually all non-wanted intrusive calls into our home and has greatly increased our quality of life time during the evening hours. Rather than being interrupted throughout the evening with telemarketers calling, we are now able to enjoy a peaceful dinner experience and quality quiet time afterwards with our 5 yr old as he learns to read. Telemarketers calling to a private residence is an unwanted intrusion upon the residents - rather than overturning NJ's program, you would do much more good by putting teeth into the federal program and modeling it after New Jersey's!!!!
